

MEMORANDUM FOR THE CABINET BY THE
HON. MINISTER OF AGRICULTURE, POWER AND COMMUNICATIONS.

Extension of a new Electricity High Tension Aerial and
Overhead System at Wied Iz-Zurrieq

-----oOo-----

The Water and Electricity Department is carrying out the extension of the Electricity High Tension Aerial System to Wied Iz-Zurrieq. This work entails the erection of Ferro Concrete Poles on privately owned lands. It is therefore necessary for the Department to have the requisite authority in terms of section 4 of the Fixed Electric Power and Telegraphic Communication Systems Ordinance (Chapter 124) by which it could carry out the works in question even if the tenants/landlords object to the trespassing of their lands so as to enable the said extension being taken in hand. It is to be pointed out that the tenants are paid compensation for any damages caused to their crops.

5th March, 1963.
